**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-5, 12-22, 32 are drawn to configure a multicast stream between a multicast content source and a base station base on request signal from wireless terminal classified in class 455, subclass 456.2.
- II. Claims 6-11, 23-31 are drawn to a wireless terminal that support a multicast service over a wireless channel in a wireless communication system, classified in class 455, subclass 452.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions [I] and [II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention

Art Unit: 2682

[II] has separate utility such as sending a request that the wireless wishes to join to a multicast group of the multicast service. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
